

# BUCKEYE DOOR TO FLOOR 4 LEVELS OF PROTECTION

## LEVEL 1 Protect yourself with the Symmetry® Hand Hygiene Program.

**CDC Recommendations:** Hand washing is one of the best ways you can help reduce the spread of germs.

**Wash your hands** often with soap and water for **at least 20 seconds**, especially after going to the restroom; before eating, and after blowing your nose, coughing, or sneezing.

If soap and water are not readily available, **use an alcohol-based hand sanitizer with at least 60% alcohol**. Always wash hands with soap and water if hands are visibly dirty.

Implement a hand hygiene program that provide tools that promote education, awareness, and motivation to practice hand hygiene.

## LEVEL 2 Intermittently protect your facility with the Eco® Proportioning Program.

**CDC Recommendations:** Clean and disinfect frequently touched objects and surfaces following product label directions and proper dwell times. Buckeye's Eco® Proportioning Program is fully integrated with effective, hermetically sealed products, including EPA emerging pathogen disinfectants, for any application.

**Clean and disinfect** frequently touched objects and surfaces.

**Follow label directions** on cleaning products and disinfectants and be sure to **follow proper dwell times**.

Use an EPA Recognized Emerging Pathogen Disinfectant.

## LEVEL 3

Continually protect your facility with Clarion® 25 Microban Antimicrobial Floor Finish and Arena® 300 Microban® Antimicrobial Wood Floor Coating.

Microban technology is built-in to these products during the manufacturing process. When microbes come in contact with the product surface, Microban technology penetrates the cell wall of the microorganism and disrupts the cell, making the microorganism unable to grow and reproduce.

Microban technology is working 24/7 and is EPA registered.

CLARION 25 AND  
ARENA 300  
WITH MICROBAN

COMPETITIVE  
FLOOR FINISH

## LEVEL 4

Protect your facility with Gateway Liners and recommendations.

Use stronger, better fitting liners to minimize contaminant exposure.  
Gateway Liners perform rigorous strength, weight, puncture and tear tests.

Properly dispose trash into lined containers and frequently replace liners.

Frequently clean and disinfect inside and outside of trash containers.
